

## Eurex Clearing FIXML Interface: New server certificates

The existing SSL/TLS certificates, which are installed on the AMQP broker, used for the Eurex Clearing FIXML Interface, are due to be renewed in Simulation and Production. This Clearing Circular informs about the replacement and the required actions by all participants using the FIXML Interface. This change affects all members connecting to our Eurex Classic Clearing System or the C7 Clearing System via FIXML.

The certificates will be signed by the Comodo certification authority (CA). The root and intermediate certificates of the CA are available for download on their official website [www.comodo.com](http://www.comodo.com).

Members are advised to download the new public keys from Eurex Website and install them in their client applications prior to the activation dates stated below. After the activation dates the connection will work only with the new public keys. This change does not affect certificates that were created by the members and uploaded in the Member Portal.

The new public keys are available for download on the Eurex Clearing website [www.eurexclearing.com](http://www.eurexclearing.com) under the following link:

**Technology > Eurex Clearing's C7 > System documentation > Eurex Clearing Interfaces**

### Contact

European Commodity Clearing AG  
Clearing Initiatives & Cooperations  
Phone: +49 341 24680-777  
E-mail: [clearinginitiatives@ecc.de](mailto:clearinginitiatives@ecc.de)

The new certificates will be activated as follows:

- In the simulation environment on **26 January 2019**.
- In the production environment on **18 February 2019**.

If required, Members can test the connectivity in the production environment. The connection test will be conducted on Saturday, 16 February 2019, between 11:00 and 15:00 CET.
