Registration as
Endconsumer of
Energy according to
the Austrian Energy
Efficiency Act
(EEFFG)

07.09.2017
Leipzig

Ref. TP08
Release 003

- only required as scan -

Preliminary remark

Due to **Austrian federal Energy Efficiency Act (EEffG)** energy suppliers of final energy consumers are obliged to take measures to increase energy efficiency in each calendar year or alternatively pay an equivalent compensation.

To date, neither the European Commodity Clearing AG (ECC) as a central counterparty nor the ECC Luxembourg S.à r.l. (ECC Lux) as part of the energy supply chain have specifically been excluded or exempted from the scope of EEffG. Due to the resulting uncertainty regarding the application of the EEffG to ECC or ECC Lux and regardless of the answers to further unresolved issues for the wholesale energy market, ECC and ECC Lux have to make appropriate arrangements to meet their potential obligations under the EEffG. This means that final energy consumers within the meaning of EEffG must register with ECC.

Period of validity

This form must be completed by all Trading Participants who intend to purchase energetic quantities from ECC Lux for the purpose of final energy consumption within the meaning of EEffG. Trading Participants are required to notify ECC of any change in the provided information immediately and upon its own initiative.

A. General information

Name of trading participant	
Name of the company	
Registered office of trading participant	
Country	Street and house number
Postal code	Place
VAT ID No.	
Tax Identification No.	

B. Registration as Endconsumer of EEFFG
