

Quantitative Analyst

- **Multi-award winning, multinational software development company**
- **Commodity pricing and analytics**
- **Full time position – London / Sydney**

Lacima is a multi-award winning trading and risk management software provider to the energy and commodities markets. With offices in Sydney, London and Boulder, we have clients in over twenty countries, including Australasia, Europe and the US. Backed by the European Energy Exchange (EEX), Lacima has been recognised as a global leader in energy and commodity pricing and analytics and employs a talented and highly educated international team of people.

Job Synopsis

As we implement a new organisational structure to accommodate planned growth, we are seeking an experienced quantitative analyst to work on project implementations and consulting assignments. In this role you will work directly with clients, primarily to ensure clients are successfully onboarded. You will achieve this by leveraging your statistical, analytical, programming and finance knowledge together with Lacima's existing models and technology to deliver leading edge, client-driven solutions in trading, valuation, optimisation and risk management.

The primary duties and responsibilities of this role include, but are not limited to, the following:

- Participate in consulting projects and client implementations from proposal to successful completion or onboarding
- Define problems, evaluate data, prepare solution specification documents and prepare reports
- Apply mathematical modelling and analysis using Lacima's existing models and technologies to deliver leading edge analysis for the financial, commodity and energy industries
- Attain and display a high level of product intimacy to ensure that client projects deliver client-oriented outcomes
- Develop, implement and manage projects to agreed timeframes, scope and budget
- Prepare documentation for Lacima's products and as needed for client projects
- Assist with project administration
- Assist with managing key project stakeholders
- Work as part of a diverse, international, multi-location team

Your Skills

To be successful in this role you must have a practical approach to quantitative analysis with a solid quantitative analyst background backed by university level mathematics and with a keen interest in financial markets. You will be self-motivated, be able to learn quickly and have the ability to adapt to new challenges and situations. You will have a professional approach to the job and your colleagues.

The ideal candidate will have:

- At least 2 years experience in a commercial environment in quantitative analysis, quantitative methods and finance
- A client focused attitude, combined with excellent communication abilities
- Ability to multi-task and deliver to deadlines
- A self-starter with the ability to work pro-actively and independently as well as part of a diverse, international, multi-location team
- Exceptional attention to detail
- A Masters degree with a quantitative emphasis

To apply

Remuneration package is competitive and commensurate with experience. To apply, please send your concise curriculum vitae and a brief covering letter outlining your salary expectations to careers@lacimagroup.com. A test of your technical documentation skill will be part of the selection procedure.

We are only accepting direct applications for this role. We are unable to accept applications submitted via headhunters / recruiters.

Due to time constraints, we will only contact applicants who have been selected to progress to later stages in the selection process.
