

## ECC C7 Migration – Production migration successfully completed

Today, the production migration has been successfully completed. Thus, we confirm the successful roll out of C7, meaning from Monday, 12 August 2019 onwards all position and transaction services are exclusively offered in C7. The new C7 system is the state-of-the-art clearing system, developed by Deutsche Boerse.

This C7 release is a mandatory release for all Clearing Members and Non-Clearing Members of ECC active on the derivatives market. The C7 release 5.0 focuses on the porting of the derivatives position and transaction services from Eurex Classic to C7. The migration of position and transaction management services to the C7 GUI provides participants with a centralised access point for all C7 transaction, position and collateral management functions.

ECC will offer you an extensive support during the first production week of C7. For operational topics, please contact Clearing & Settlement operations (phone +49 341 24680-444; email [clearing@ecc.de](mailto:clearing@ecc.de)).
