

Introduction of SMSS self-service password reset and changes in Physical Settlement

Summary

ECC has introduced a self-service to reset the members password at ECC Member Area.

Furthermore a number of European Market Coupling projects, which involve also ECCs Clearing activities, are live.

Finally, a change for nomination procedures at the Hungarian TSO MAVIR allows ECCs Partner Exchange MAVIR to reduce the trading lead time.

Self-service password reset for ECC member area

At ECC member area, a new function for all registered members is available to reset their own password. To use this state-of-the-art feature, each member must enter his user-ID as well as the registered email address.

After requesting a password reset, the member receives an email with the token for password reset.

By introducing this feature, ECC enhances its service and allows members to reset the password also outside of ECCs business hours.

Go live of European Market Coupling Projects

ECC successfully launched the Interim Coupling Project in close co-operation with EPEX Spot and HUPX on 17 June 2021. Hungary, Slovakia, the Czech Republic and Romania joined the Single Day-Ahead Coupling.

With that, ECC contributes significantly to a further milestone in providing a unified Day-Ahead power market within the European Union. ECC now ships electricity at the borders between Germany, Poland, the Czech Republic, Slovakia, Austria and Hungary of the Single Day Ahead Coupling area. With the addition of those new borders to the European Market Coupling topology the liquidity and welfare are expected to increase in HUPX and EPEX markets.

Additionally, on 22 June 2021, ECC successfully launched the Hansa Multi Nemo Arrangement Implementation in close co-operation with EPEX Spot and the concerned TSOs 50 Hertz, Energinet, Tennet Netherlands and Tennet Germany. At the borders between those TSOs, ECC is now acting as Shipping Agent and thus contributes significantly to a unified Day-Ahead power market within the European Union.

Shift of Nomination Deadline at the Hungarian TSO MAVIR

The Hungarian TSO MAVIR has changed its market rules and allows nominations within the Hungarian market area until the start of delivery. By this change, HUPX and ECC have changed their processes and will support a trading until 15 minutes before delivery.
