

# Change of IP Address of ECC Member Area

## Summary

ECC would like to inform you about the change of the IP address of the ECC member area which is scheduled for Tuesday, **22 February 2022**. The simulation environment of the ECC member area is already available under a new IP address. This circular provides you with detailed information and provides a short test description.

## Change of IP Address of ECC Member Area

Due to ongoing improvements, we will migrate the ECC member area to a new IP address. From **31.01.2022** onwards the simulation environment of the ECC member area with the URL **smsssimu.ecc.de** will be mapped to a new IP. Further, from **22.02.2022** the production environment of the ECC member area with the URL **smss.ecc.de** will be mapped to a new IP.

To test your network setup, a dedicated URL was prepared pointing to the new IP of the simulation environment. Each user can test if the new IP address is accessible by clicking on the following Test-URL:

**<https://smsssimu.eex.energy/>**

The Test-URL leads you directly to the simulation environment of the ECC member area. We kindly ask you to click the above URL and check if you are forwarded to the simulation environment of the ECC member area which looks like this:

The screenshot shows the ECC member area login page. At the top, there is a grey banner with a cookie consent message: "EEX group uses technically necessary cookies to optimize your experience on this website. Please find further information in our [Privacy Policy](#)". Below the banner is the ECC logo. The main content area has a blue and white geometric background. On the left, there is a "Login" section with a "Public" label, "Username" and "Password" input fields, and "Login" and "Reset Password" buttons. On the right, there is a "Direct Contact" box with the following text: "Direct Contact", "Clearing & Settlement", "Phone: +49 341 24680-444", and "clearing@ecc.de". At the bottom of the page, there is a footer with copyright information: "© 2021 European Commodity Clearing AG" and "Version: 6.1.1.0 (72952676773068600764684400040004686)", along with links for "Imprint", "Disclaimer", and "Privacy Policy".

If you are forwarded, the test is successful and we do not expect any issues with the change of the IP addresses of both URLs.

However, if you have problems reaching that webpage, please contact **your IT department** to adapt your company's firewall to the new IP addresses accordingly:

Environment	Domain name	Current IP	New IP	Valid from
SIMU	smsssimu.eex.energy	-	193.29.70.21	today
SIMU	smsssimu.ecc.de	85.239.110.89	193.29.70.21	31.01.2022
PROD	smss.ecc.de	85.239.110.93	193.29.70.20	22.02.2022

### Preparation for migration of ECC Member Area Reporting SFTP Server

As part of the improvements, the SFTP Servers **ftps.ecc.de** and **ftpssimu.ecc.de** will be moved to a new data center in Q2/Q3 2022 and IP addresses will change too. The date and necessary actions will be announced in advance of the migration and no action is necessary right now. However, to support the process and reduce effort on your side, we recommend the following preparation step:

In case you or your application accesses our SFTP server directly by using their public IPs, we advise you to switch to use their domain names instead.

If you call our SFTP server via 85.239.110.88 à please use **ftps.ecc.de**

If you call our SFTP server via 85.239.110.92 à please use **ftpssimu.ecc.de**

Please note, both calling methods remain valid until further notice.
