

## Optimisation of tradability for EEX Power and EUA Options on option exercise days

European Energy Exchange (EEX) is optimising the tradability of its options on EEX Power and EUA Futures on the option exercise date.

Currently, later option maturities are no longer available for orderbook trading and trade registration after 15:00 CE(S)T on the exercise date of expiring options. In order to provide more flexibility for trading participants, EEX will extend the tradeability of the option maturities that do not expire that day until 18:00 CE(S)T, effective as of 26 August 2022.
