

## Adjustment of the settlement window for EEX Power Derivatives

### Summary

For all EEX European Power Derivatives markets except the Nordics, the current settlement window (time frame for determining the daily settlement prices) between 4:20 pm - 4:30 pm CET will be shifted to **5:05 pm - 5:15 pm CET**. Consequently, the publication of ECC SPAN file will take place approx. 30 minutes later than today. The change will be effective as of **5 December 2022**.

With this adjustment, EEX follows the wish of its market participants for a harmonized settlement window across all markets of the asset classes power, gas and emissions and completes the change announced in June 2022 ([link to customer information](#)).
