Change of ECC FTP Server

Due to ongoing improvements, we will migrate the ECC FTP Server. From **22 May 2023** onwards the simulation environment of the ECC FTP Server with the URL **ftpssimu.ecc.de** will be mapped to a new IP address and will be reachable with the default protocol ports only. Further, from **June 2023** the production environment of the ECC FTP Server with the URL **ftps.ecc.de** will be mapped to a new IP address and will be reachable with the default protocol ports only.

If you are accessing the FTP Server via the following URL:

<div align="center">

ftpssimu.ecc.de

</div>

you will be routed to the new IP from 22 May 2023 onwards, so there is no further action necessary.

However, if you are using the old IP address to access the FTP Server, please adjust your connection parameters (ideally via the URL named above). In any case you should contact **your IT department** to adapt your company's firewall to the new IP addresses accordingly:
