

EEX extends Trade Registration Services for European Power and Gas

Summary

Effective from trading day **3 November 2025**, the Trade Registration Window for all EEX Derivatives contracts in the asset classes European Power and Gas will be extended and harmonized to 18:15 CET.

This operational adjustment aims to enhance the efficiency of Trade Registration. Position Transfer processes – including Give-Up and Take-Up transactions – are not affected and remain unchanged possible until 18:45 CET.

For the avoidance of doubt: This change does not affect the timing or methodology used for the determination of Daily or Final Settlement Prices. Furthermore, the opening hours for order book trading remain as usual until 18:00 CET as well.

Please do not hesitate to contact us if you have any further questions.
