

ECC Member Area Maintenance

On 10 July from 19:30 to 22:30 CET ECC will perform a maintenance on its trade processing system which also consists of the ECC Member Area and infrastructure components.

The patch to the trade processing system will resolve the following issues:

- Searches in the Online View did not display single delivery day only, but also trades from the next delivery day
- Needless separation of tables on the PDF invoices
- Incorrect temporary balance displayed in the Emission Delivery Report

Since some of our partner exchanges will perform their own maintenances at the same time the respective market halts will be communicated by the exchanges individually.

We would like you to have a higher awareness during and shortly after the maintenance.
